Educational Technology

Educational technology is the application of technology to the teaching and learning process. In order for students to be prepared for the 21st Century, Oregon schools need to provide opportunities for students to use technology skills that are applied in a variety of courses, subjects, experiences and settings. A technologically literate student accesses and acquires knowledge, exchanges ideas and opinions, solves problems, and creates, innovates and expresses themselves through the skillful use of a variety of technologies.

Text in grey boxes denotes technology standards. Text in plain font denotes indicators related to standards.
