Mathematics Advanced Knowledge & Skills (AK&S)

In addition to the standards for high school, ODE has created advanced mathematics knowledge and skills organized by five disciplines: algebra, trigonometry, discrete mathematics, statistics, and calculus. These advanced knowledge and skills are intended to provide students with more options for advanced course work and to assist teachers in planning differentiated instruction. These advanced knowledge and skills are not part of the “official” high school mathematics standards and are not assessed on the Oregon Assessment of Knowledge and Skills (OAKS).
